CW QSO Work Sheet
~~When my code impoves I will get on the Air~~
When I get on the Air my code will improve

QRL?

CQ CQ CQ DE VK4JE VK4JE CQ PLS K

Station Responds, you only need their callsign:

Their Callsign or Name = UR 5NN 5NN = QTH Maleny ES OP RON = DE VK4JE

Station Responds Again:

Their Callsign or Name = TU FER QSO HPE CUAGN 73 73 = DE VK4JE e e

How you run your CW QSO is a matter of personal choice, it can be a 'rag chew' or 'quick and dirty' the choice is yours. The reduction in Callsign sending is legal as both stations have sent their callsigns and QSO within 15 Minutes.
Also if the responding station wants to 'Rag Chew' your friendly and courteous over will bring the QSO to a close.

You may find a version of a QSO above a good way to build up your Confidence, Sending and Coping abilities. As long as you have the CallSign any missing Information for your log will be available at qrz.com

With the exception of their callsign you can practice the rest of the QSO until the 'Cows Come Home'

Hope it helps.
